Day Name
All

Weekend
No
Yes

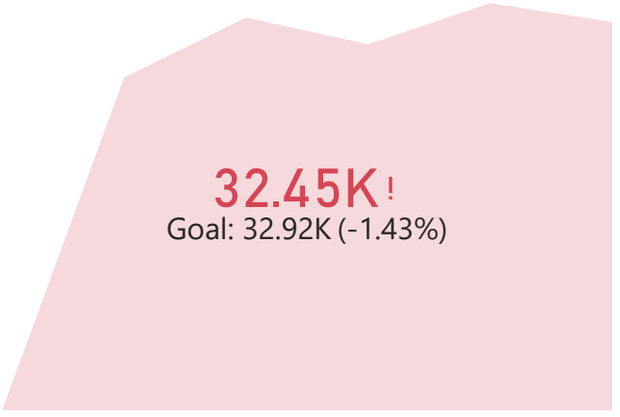

Key Takeaway:
Demand problem: empty seats. Angel Stadium is 69% full on average, and Value games, all on Mon–Thu, fill only about 58%. Day of week and opponent drive attendance; the Dodgers and Yankees draw about 5K above expected. Opportunity: put weekday promotions, discounts and group sales on Value games against low-draw opponents.

Demand Drivers

Note:
Rankings come from each team's best model: Dodgers = core features; Angels = core features + opponent draw (which improved Angels accuracy but not Dodgers)

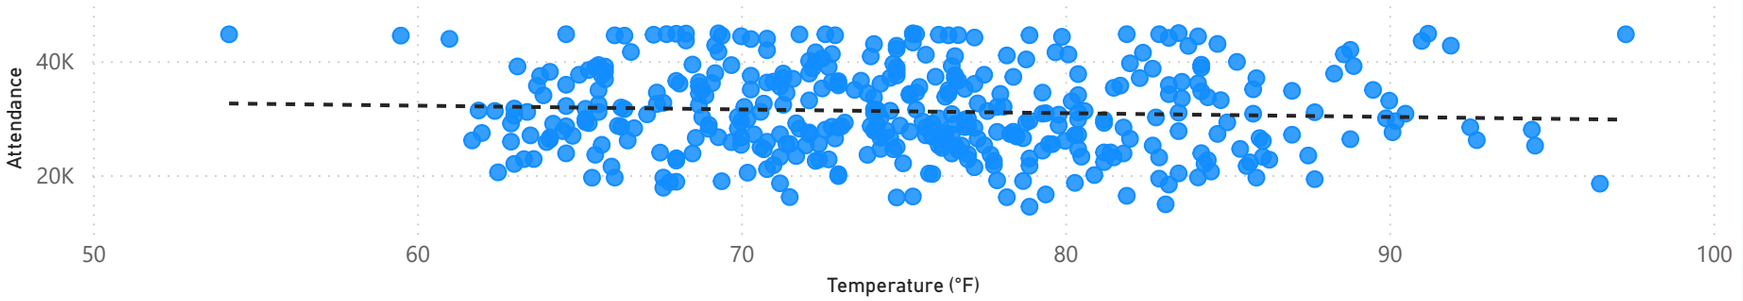

Key Takeaway:

Day of week is the biggest driver: midweek games draw the smallest crowds. Opponent matters almost as much: the Dodgers and Yankees draw ~5K above expected. Focus promotions on weekday games against low-draw opponents.

Model Performance

Team
- (●) Angels
- ( ) Dodgers

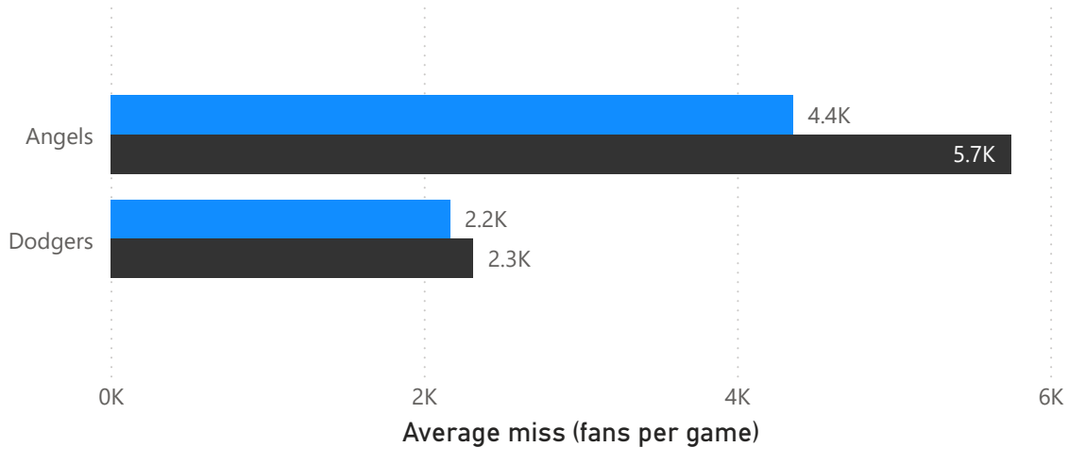

5747	4358	24.17%	45.68%
Baseline MAE	Best MAE	Improvement vs Baseline	Games within 10%

- Accuracy: The model misses by about 4,358 fans per game, compared with 5,747 for a simple 2025-average guess (24% better). 46% of games were predicted within 10%.
- Where it struggles: Crowds beat forecasts in April–July and fell short in August. Team performance and the playoff race likely matter more than the model captures.
- Next step: Add standings or playoff-odds features to reduce the biggest misses.

Game Tiers

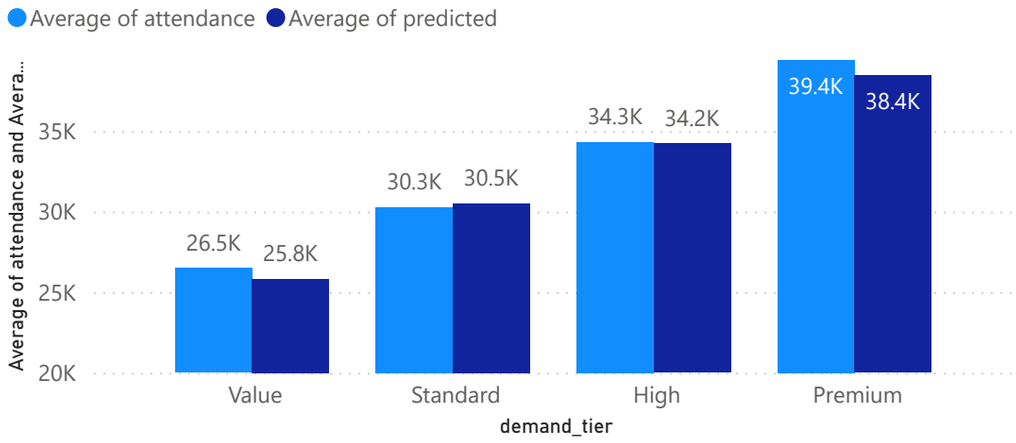

Key Takeaways:

Value games fill only 58% of seats, compared with 80% for High and Premium games. These low-demand games are where weekday promotions, discounts and group sales should go.

Dodgers Promos 2025–2026

Key Takeaways:
Star-player bobblehead nights drew about **1,200 more fans than the model expected**, the strongest result of any promotion. With only 19 games, the result is suggestive but not yet statistically confirmed (p ≈ 0.10).
Other promotions (heritage, pop culture, celebrity and family nights) landed at or below expected, so there's no sign they add attendance on their own.
Recommendation: Keep star bobbleheads, and test them on softer Value-tier weekday dates, where there are empty seats to fill. Track the results over another season to confirm the lift.
Note: Dodgers only. 2025 data covers giveaways only. Each season was predicted by a model trained on earlier seasons.
